The Bell Creek Story

CO₂ in Action

Airing of the Prairie Public Broadcasting Video Hosted by Dan Cole – Denbury Resources

- Published on Jan 2, 2018
 - Boom and bust; it's the story of the frontier. For southeastern Montana, boom times came with cattle in the 1880s and with oil in the 1960s. Now, carbon dioxide from human activities is bringing the Bell Creek oil field back to life.
 - CO₂ is safely stored geologically, keeping an emission stream from the atmosphere that would have been released while giving renewed economic returns to the region.
